

Poster Session D1

08:30-10:00, Jul. 15, 2026 2026 年 7 月 15 日 08:30-10:00

Connected and Autonomous Vehicles (CAVs) & Intelligent Control 网联与自动驾驶车辆 (CAVs) 及智能控制
Multi-modal Transportation Planning, Operation and Mobility 多模式交通规划、运营与出行服务
Ship/Marine Equipment Engineering and Technology and Marine Transportation Management 船舶/海洋装备
工程技术与海洋运输管理

Poster ID	Paper ID	Paper Title
D1-1	17	Edge-Layer Infrastructure Deployment Method for Positioning Services in Connected Vehicles
D1-2	86	Robust Control of Vehicle Lane-Change Trajectory Integrating Deep Learning and H ∞ Loop Shaping
D1-3	120	Analysis on the reliability of travel time in the connected and autonomous vehicle mixed road network
D1-4	125	Multilevel Hub Network Plan Method for Intra-City in Mobility as a Service
D1-5	159	A Game-Theoretic Passing Strategy for Connected Autonomous Vehicles at Unsignalized Intersections
D1-6	161	What Factors Influencing Tourists' Combined Travel Modes Choices: A Case Study of Beijing-Tianjin-Hebei Region
D1-7	169	Intelligent Analysis and Detection of Anomalous Vehicle Behaviors Using Micro-Trajectory Data
D1-8	202	Efficient Feature and Model Selection for Pedestrian Crossing Behavior Prediction
D1-9	224	Multi - Agent Reinforcement Learning based On-ramp Merging Control Strategy in Mixed Traffic Flow Considering Global Efficiency
D1-10	229	Resilient and Collision-Free Enhanced Car-Following Control Scheme under Multi-Source Uncertainties: a Dynamic Safety Boundary-based Switching Control Approach
D1-11	230	Driver Behavior Analysis and Accident Causation in Advanced Driver Assistance Systems
D1-12	231	Delineation of Service Areas for Microcirculation Bus Lines Based on Rail Transit Station Catchment Zones
D1-13	232	Research on Gesture Recognition for In-Vehicle Scenarios under Different Light Conditions
D1-14	239	An LLM-driven System for Comparative Evaluation of Traffic Planning Schemes
D1-15	251	Driving Style Identification Considering Vehicle Lane-Changing Behavior
D1-16	253	Research on the Optimization Scheduling Method of eVTOL in Airport Shuttle Mode
D1-17	254	Topology Optimization-Driven Lightweight Design of Prefabricated Cruise Balcony Structures
D1-18	271	Vehicle-Infrastructure Cooperative Systems for Slow-Moving Vehicles on Urban Expressways
D1-19	288	A Benchmark for Cooperative Control in Mixed Traffic Environment
D1-20	296	Evaluating the Comprehensive Benefits of AR-HUD in Connected Rear-End Collision

		Events: A Coupling Coordination Degree Model Approach
D1-21	299	A dual-branch feature extraction architecture based variable speed limit control strategy considering local-global features in mixed traffic flow
D1-22	308	Game-Theoretic Model Predictive Control based Vehicle Control Method Integrating Risk Modeling
D1-23	322	Template Matching Based Automated Test Scenarios Construction for Vehicle-Infrastructure Cooperative System
D1-24	328	Collaborative Optimization Method for Vehicle-Station Linked Passenger Transport Organization in Urban Rail Transit
D1-25	335	Traffic Police Gesture Recognition with Large Language Model Agents for Autonomous Vehicles
D1-26	344	Traffic Arrival Rate Estimation Using Cross Intersection Connected Vehicle Trajectory Data
D1-27	368	An Adaptive Kalman Filter-Enhanced Artificial Potential Field Controller for CAV Car-Following to Mitigate Sensing and Communication Delays
D1-28	369	Context-Aware Chinese Semantic Matching Model for the Transportation Industry
D1-29	395	CMATP: Risk-Aware Continual Learning for Multi-Agent Trajectory Prediction
D1-30	399	Integrating Complexity-Aware Speed Prediction with Routing Optimization for AECT in Semi-Open Environments
D1-31	404	Regression Tree -based Vehicle Classification Method for 4D Millimeter-Wave Radar Elevation Data
D1-32	409	Application and Performance Testing of 5G Lightweight RedCap in the Internet of Vehicles
D1-33	410	A Calibration Model for Interaction Parameters in Autonomous Vehicle–Electric Bicycle Mixed Traffic Based on BEVFormer
D1-34	416	Key Technologies for Automotive Satellite Communication Based on Low-Earth Orbit Satellites and Verification of Short Message Technology
D1-35	445	Pan-V2X: A Comprehensive Exploration of Concepts, Architectural Framework, Diverse Applications, and Practical Implementations
D1-36	450	Research on Tourist Road Layout Based on Node Importance
D1-37	461	Generating Interactive Trajectories of Background Vehicles for Autonomous Driving Testing Scenes: A Multi-Agent Control Approach
D1-38	473	Collaborative Control Method for Emergency Vehicle Rapid Transit at Intersections in Connected Traffic Environment
D1-39	491	DiCSA: Dimensional Channel–Spatial Attention for Onboard Road-Scene Semantic Segmentation
D1-40	523	AI Optimization of Age-Friendly Metro-Bus Transfer: A Study of Cognition and Heterogeneity
D1-41	547	Automated Vehicles Different from Human-Driven Vehicles in Car-following Behavior: Evidence from the V2X-seq Dataset
D1-42	553	Distributed Deep Reinforcement Learning Cooperative Control of Connected and Automated Vehicles Integrating Lane Change Prediction and Dynamic Communication

		Perception
D1-43	572	Research on the Construction Method of Joint Steady Process with Multiple Traffic Parameter Disturbances
D1-44	574	Analysis of the Adaptability and Control Effectiveness of Synchronous Green Wave
D1-45	575	A Study on Traffic Breakdown Phenomena in Mixed Traffic Flow
D1-46	582	A Pedestrian Trajectory Prediction Method Based on Dynamic Iterative and Social Interaction for Autonomous Vehicles
D1-47	583	Geometry-Aware Adaptive Fault-Tolerant Control for Mixed Traffic Flow under Actuator Saturation
D1-48	619	Research on Planning Methods for the Collection and Distribution System of Integrated Passenger Transportation Hubs
D1-49	626	Evaluation of Learning Internalization Capabilities of AVs Based on Time-Series Correlation Analysis
D1-50	629	Analysis and Simulation of User Behavior on Parking Choices in Autonomous Vehicle Drop-off Zones
D1-51	641	Fundamental Diagram Modeling and Simulation of Mixed Traffic Flow Considering Functional Degradation
D1-52	647	Spatiotemporal Analysis and Station-tiered Framework for Ride-pooling Feeder Services: A Case Study in Suzhou
D1-53	648	Optimizing Vacant Taxi Routing under Competition with Soft Actor-Critic (SAC) and Multi-Objective A* Search
D1-54	681	Diffusion-Based Framework for Safety-Critical Scenario Generation in Autonomous Driving under Map Conditions and Physical Constraints
D1-55	693	A 3D Point Cloud Detection Method for Buses in Intersection Scenarios
D1-56	697	Modeling Human Driving Intentions via Inverse Reinforcement Learning with a Real Driving Intention Library
D1-57	707	Causal Reinforcement Learning-Based Decision-Making Method for Cooperative Vehicle-Infrastructure Autonomous Driving in Safety-Critical Scenarios
D1-58	713	Distributed Physics-Informed Deep Reinforcement Learning Framework for Longitudinal Control of Autonomous Vehicles
D1-59	714	Evaluation of Mixed Traffic Operation Status in Merging Areas under TD3 based Cloud Control Algorithm
D1-60	718	Multi-Agent Path Planning for Smart Port Logistics: A Hierarchical Game-Theoretic Coordination Framework
D1-61	719	Spatiotemporal Heterogeneity of Taxi Trip Demand: An MGWR Built Environment Analysis Incorporating Bus Service Level
D1-62	724	Research on Nonlinear Model Predictive Control Algorithm for Ackermann Dynamic Model of Transfer Robots
D1-63	727	Explainable Traffic Flow Prediction with LLMs via Multi-Modal Spatio-Temporal Fusion
D1-64	734	Regional-Subdivided-Lane Differentiated Variable Speed Limit Control Strategy and its Traffic Flow Evolution Analysis Under Varying Penetration Rates of Connected and

		Automated Vehicles
D1-65	735	Research on Multi-Scenario Optimization Pathways for AI-Empowered Sustainable Development of Rail Transit
D1-66	737	Design of a Dedicated Lane Management and Control System for Intelligent Connected Vehicles on the Liwen Expressway
D1-67	738	Research on Trajectory Tracking Control Method of Intelligent Vehicles Based on Model Predictive Control
D1-68	739	Spatial Characteristics of Rural Residents' Travel Activity Space Using Mobile Phone Data: A Case Study of Qingdao
D1-69	753	Transfer Efficiency Evaluation and Optimization Strategies for Comprehensive Passenger Transport Hubs
D1-70	764	A Multi-modal Transportation Coordinated Scheduling Model Based on High-Speed Rail Information
D1-71	769	Research on Signal Control Methods for Highway Entrance Ramps Based on Deep Reinforcement Learning
D1-72	770	Integrated Scheduling and Routing Optimization of a Co-modal Subway and Truck Distribution
D1-73	779	Research on Simulation Analysis of Drivers' Fatigued Driving States
D1-74	210	Driver's Gaze Target Identification by Fusing Gaze Estimation and Scene Understanding
D1-75	300	Simulation-Based Robustness Optimization of Rhythmic Control for CAVs at Isolated Intersections
D1-76	451	Risk-Aware Graph Attention Safe Reinforcement Learning for Autonomous Driving in Work Zones
D1-77	507	Charging Behavior and Heterogeneity among Electric Ride-Hailing Taxi Drivers in Shanghai
D1-78	534	A Macro-Micro Two-Layer Variable Speed Limit Control Strategy for Mixed Traffic Flow with Connected and Autonomous Vehicles
D1-79	573	Optimal network design of conventional public transit under impacts of rail transit in urban central areas
D1-80	589	Analyzing the Impact of the Mixing of Connected-Autonomous and Autonomous Vehicles on the Operation of Freeway Merging Areas
D1-81	631	Why Is Driver Situation Awareness Crucial in Level 3 Automation? Understanding Perception and Reaction during AV Takeovers in Pedestrian Conflict Scenarios
D1-82	632	Safety vs. Trust: Can Automated Vehicles Successfully Navigate Dilemma Zones from the Driver's Perspective?
D1-83	649	The Effectiveness Evaluation of Connected Vehicle Warning Systems on the Transition of Driving Conflict Risks in Complex Curved Scenarios
D1-84	785	An Integrated Mobility and Safety Optimization Framework through Dynamic Variable Speed Limit Under Connected and Automated Vehicles Environment
D1-85	795	Assessing Rail Transit Station Accessibility and Spatial Equity with Perceived Travel Distance

Poster Session D2

10:30-12:00, Jul. 15, 2026 2026 年 7 月 15 日 10:30-12:00

Transportation System Management & Operation (TSM&O)

交通系统管理与运营

Emission Reduction & Energy Efficiency in Transportation

交通减排与能源效率

Equity, Accessibility & Social Impact of Transportation System

交通系统的公平性、可达性及社会影响

Poster ID	Paper ID	Paper Title
D2-1	18	Research and Practice of Key Technologies for Building an Integrated "One-Network" Travel Service System
D2-2	29	Capacity Analysis of Expressway Merge Areas under New Mixed Traffic Flow Based on PSO-XGBoost
D2-3	38	A Comprehensive Survey of Variable Lanes: Control Strategies and Applications
D2-4	40	Carbon Emission Reduction Calculation Method of LDV's Air Conditioning during In-use Phase
D2-5	49	A Cooperative Control Method for Urban Expressways Based on Deep Reinforcement Learning
D2-6	52	Combined Bus Holding and Signal Priority Strategy for Enhancing Headway Regularity on Urban Corridors
D2-7	70	Coordinated control method for urban arterial traffic signals based on deep reinforcement learning
D2-8	79	Mechanism Innovation and Model Research for Transportation Data Element Circulation Enabled by National Data Infrastructure
D2-9	80	A Hierarchical and Zonal Iteration Calibration Method for the BPR Function Using Traffic Volume Data on Highways
D2-10	93	Systematic Comparison of Multi-Criteria Decision-Making Methods from the Perspective of Weighting–Ranking Combinations
D2-11	97	An Evaluation Method for Urban Rail Passenger Service Quality Based on the SERVQUAL Model
D2-12	112	Research on Optimization and Implementation Effect of Differentiated Toll Collection Scheme for Freight Vehicles on Highways
D2-13	113	Data-Driven Analysis of Spatiotemporal Characteristics and Hptspot Identification of Urban Taxi Trips
D2-14	114	Optimization of the Multi-modal Public Transportation Network under Geographical Constraints
D2-15	128	A Data-Driven and Outlier-Aware Framework for Online Traffic State Identification
D2-16	165	On Classifying ISO Containers Using Computer Vision: a Deplaoyment-Oriented Baseline from Gantry Views
D2-17	168	Demand-Responsive Transit Passenger Flow Forecasting with Gated Fusion and Multimodal Graph Attention
D2-18	173	Research on the Impact of Built Environment on Urban Motor Vehicle Carbon Emissions
D2-19	181	DSTGFormer: A Dual-stage Spatio-Temporal Graph Transformer for Traffic Flow Prediction under Varying Gantry Densities

D2-20	197	A Bi-level Optimization Model for Bus Stop Reorganization around Metro Stations Considering Passenger Choice Behavior
D2-21	208	Research on Vehicle Scheduling Optimization Considering Workstation Capacity Constraints: A Case Study of Fuzhou Municipal Integrated Management Unit
D2-22	209	Emergency Traffic Evacuation Planning for Large-Scale Diffusion Disasters: A Case Study of Volcanic Ash Evacuation
D2-23	260	Exploring the Impact of Determinants on Spatial Accessibility to Rural Primary Schools: A Case Study from Guiyang
D2-24	263	Research on the Influence Mechanism of Children's Escorting Decisions from the Perspective of Family Activity Space
D2-25	279	Research on the classification of subway stations considering bike-sharing cooperation and competition relationship
D2-26	280	An Engineering Practice: Real-Time Intelligent Monitoring and Advisory System for Traffic Anomalies on Large-Scale Bridges
D2-27	292	ASTF-Net: Estimated Time of Arrival Prediction with Asynchronous Flight Trajectories
D2-28	306	A Collaborative Evaluation of Job-Housing Spatial Patterns and Transportation Supply Equity for Urban Vulnerable Groups: A Case Study of Nanjing
D2-29	309	SOC Prediction for Electric Vehicle Batteries: A TCN-LSTM Modeling Considering the Influence of Speed
D2-30	313	Spatiotemporal Demand Analysis of Bike-Sharing Systems Using Community Detection and Geographically Weighted Regression Models
D2-31	315	Exploring the Nonlinear Impact of Built Environment on the spatial vitality of metro station areas: A Case Study of Kunming City
D2-32	321	A Novel Real-Time Framework for Joint Gate–Runway Assignment in Airport Surface Operations
D2-33	329	Visualization Research on Disease Distribution of Medium-Small Span Concrete Girder Bridges During Maintenance and Operation Period Based on Traffic Digital Base Map
D2-34	332	Research on Full-Element Standardized Representation System of Expressway Interchanges in High-Precision Digital Base Maps
D2-35	334	Construction and Application of Quantitative Evaluation System for Informatization Systems in Transportation Enterprises
D2-36	351	The Spatio-temporal Characteristics of Traffic Emissions under Heavy Truck Restriction Policies: A Case Study of Chaoyang District, Beijing
D2-37	377	Coordinated Planning of Charging and Battery-Swapping Facilities for Battery-Electric Heavy-Duty Trucks in Port Hinterland Drayage
D2-38	396	A Hybrid Deep Learning Framework with Bayesian Optimization for Accurate Truck Travel Time Prediction Using ETC Data
D2-39	397	Impact of the Built Environment on Passenger Flow Imbalance at Rail Transit Stations During Peak Hours
D2-40	401	Research on Optimization Method of Public Transit Network Based on Adaptive Large Neighborhood Search Algorithm
D2-41	406	Multi-Scenario Highway Management and Control Based on Macro-Micro Simulation

D2-42	462	Evaluation of rural road service satisfaction in the context of rural revitalization
D2-43	476	RELATING CAR AVAILABILITY TO REGIONAL WALKABILITY - A HIERARCHICAL INVESTIGATION ON NATIONAL DATABASES
D2-44	485	Energy-Saving Control of Heavy-Haul Trains Based on Time Deviation
D2-45	487	Dynamic Assignment Method of Traffic Flow for Expressway Network in Connected Vehicle Environment in the Face of Emergencies
D2-46	497	Identification and Analysis of Traffic Bottlenecks in Urban Expressway Networks
D2-47	512	System Dynamics Modeling and Policy Evaluation of Expressway Carbon Emissions
D2-48	516	Analysis of Fault Influencing Factors in Electric Buses: A Case Study of Beijing
D2-49	532	A Life-Cycle-Assessment with Sensitivity Analysis: Evaluating the Carbon Advantage of High-Speed Rail and Air Travel
D2-50	537	Data-Driven Spatiotemporal Analysis of Taxi-Subway Coopetition: Evidence from Xi'an
D2-51	543	Multimodal-Transport Connection and Signal-Coordination Optimization at Zhengzhou East Station
D2-52	554	Research on the mechanism of built environment impact on commuter activity and travel time-space flexibility
D2-53	556	Research on Anomalous Event Detection and Scene Description for Expressways Based on Multimodal Large Language Model
D2-54	586	Research on the Impact Mechanism of Vehicle Lane-Changing on Road Traffic Operation and Corresponding Control Strategies
D2-55	591	Arterial Coordination Performance Evaluation Using Probe Vehicle Data
D2-56	592	Comprehensive Benefit Evaluation Framework of Medium-Capacity Transit System
D2-57	593	Network-wide Traffic Congestion Prediction and Multivariate Analysis with Incomplete Multi-Source Crowdsourcing Data
D2-58	608	Modeling Ride-Hailing Usage Frequency Determinants and User Heterogeneity
D2-59	613	Identification of Microscopic Traffic Incidents Based on Multi-Source Data and Analysis of Their Impacts on Macroscopic Traffic Flow
D2-60	624	An Integer Programming-Based Comprehensive Cost-Constrained Optimization Model for Toll Station Staff Scheduling
D2-61	627	Estimation of traffic carbon emissions for highway segments combining macro and micro characteristics: a case study of Guangdong Province
D2-62	650	Online Routing for Shared E-Bikes under Distributed Scheduling and Retrieval
D2-63	667	A Dual-Agent Reinforcement Learning Approach for Signal Control Optimization in Intelligent Connected Traffic Systems
D2-64	676	PM Exposure: Travel Modes and Built Environment Links in Small and Medium-Sized Cities
D2-65	686	A Data-Driven Approach for Quantifying Highway Capacity Reduction under Heavy Rainfall

D2-66	689	Transformer-based Traffic Speed Prediction for Freeway Merging Zones
D2-67	694	Highway Freight Volume Forecasting Based on LSTM-GCN
D2-68	699	Arterial Signal Coordination Design Based on Multiband Model and VISSIM Simulation
D2-69	700	Optimization of Emergency Bus Bridging under Unplanned Disruptions of Urban Rail Transit
D2-70	708	Exploring the Roles of the Factors Influencing the Usage of Shared Electric Vehicles in Cross Regional Travels
D2-71	721	A Comparative Study on Shared Bicycles' Capability in Alleviating Traffic Congestion Across Typical Chinese Cities
D2-72	741	Research on Methods to Alleviate Congestion at Exit Ramps of Elevated Expressways in Urban Logistics Distribution
D2-73	744	Study on Pavement Performance and Surface Functional Properties of Warm Mix Rubber Asphalt Mixtures
D2-74	746	Investigating the Synergistic Relationship Between Metro and Ride-hailing: A Multi-source Data Approach
D2-75	748	Study on Energy Consumption and Carbon Emissions Accounting of Regional Highway Transportation Based on the Bottom-Up Approach
D2-76	749	EventYOLO: Highway Event Detection MethodBased on Improved YOLOv10 and Motion Analysis
D2-77	751	Sudden Extreme Weather-Aware Urban Traffic Flow Forecasting Method
D2-78	757	Investigation into the Stress Characteristics of Bridge Approach Slabs in Road-Bridge Transition Sections
D2-79	771	Assessment of Vehicle-Following Dimming Control Strategies on Energy Savings in Expressway Tunnel Lighting Systems: A Simulation-based Case Study
D2-80	784	Multi-Model Evaluation and Interpretable Analysis of Battery State-of-Charge Estimation for New Energy Vehicles under Complex Operating Conditions
D2-81	806	Evaluation of Urban Public Transport Travel Satisfaction from the Perspective of Aging-Friendliness
D2-82	135	A Three-level Circular Economy Framework to Measure Circularity for Meso-level Assessment in Pavement Construction.
D2-83	194	Variable Speed Limit Control for Highway Work Zones: A Gaussian Plume Approach to Optimal Control Zone Length
D2-84	356	Investigating the Competition–Cooperation Relationship Between Cruising Taxis and Ride-Hailing Services from a Spatiotemporal Perspective: Insights from Wuhan, China
D2-85	546	Link-Level Energy Consumption under Electric Vehicle Penetration Using Real-World Vehicle Trajectories: Case Study in Beijing
D2-86	580	Predicting Short-Term Freeway Traffic Flow by Leveraging Different Time Granularities
D2-87	761	Multi-Scale Physics-Informed Neural Networks for Traffic State Estimation from Microscopic Trajectory Observations

Poster Session D3

14:00-15:30 Jul. 15, 2026 2026 年 7 月 15 日 14:00-15:30

Digital Twin & Simulation Applications for Smart Transportation

Sustainable Freight Transportation and Logistics

Rail Transportation Operations, Management and Control

Transportation Economy, Policy and Management

数字孪生与交通仿真应用

可持续货运与物流

铁路运输运营、管理与控制

运输经济政策与管理

Poster ID	Paper ID	Paper Title
D3-1	9	Unveiling How the Interaction Between Road Congestion and Built Environment Affects Metro Station Ridership Through Machine Learning Model Interpretation
D3-2	19	Spatial vs. Temporal Formulations of the Classic Train Eco-driving Problem
D3-3	22	Safety Risk Analysis of Urban Rail Transit Facilities and Equipment: A Case Study of the Shanghai Metro
D3-4	42	Design and 3D Modeling of Lifting Device for Pure Electric Forward - Moving Forklift
D3-5	57	Modeling and Empirical Analysis of Turn-Back Capacity under Different Terminal Station Modes in Urban Rail Transit
D3-6	75	Identification of low-carbon freight corridors and research on emission reduction pathways based on highway networks: Evidence from China
D3-7	77	Research on Indirect Prediction Method of Wheel-Rail Force Based on Frequency Domain Characteristics of Frame Loads
D3-8	98	Research on the Planning and Layout Method of Electric Heavy-Duty Truck Charging Stations Based on the Expressway Network
D3-9	99	Research on Competitiveness Evaluation of the Regional Transportation Industry from the Perspective of National Strategies: A Case Study of Inner Mongolia
D3-10	103	Design of Deep Underground Logistics Storage System
D3-11	104	Design of Cold Chain Logistics System Based on Surplus Capacity of Metro Passenger Flow
D3-12	105	Design of Urban Garbage Underground Transportation System Based on the Comprehensive Pipeline Corridor
D3-13	111	Research on Risk Prevention and Control of Transportation Organization Scheme for Non Station Delivery Mode
D3-14	121	Research on Multimodal Transportation Path Optimization and Collaborative Scheduling for Trunk Railway Connected Terminal Drop-and-Pull
D3-15	141	Research on Consolidating Passenger and Freight Transport in Urban-Rural Bus Services
D3-16	146	An Exact Algorithm for the Multi-Allocation Hub Location Routing Problem Arising in the Design of Intra-City Express Delivery Systems
D3-17	151	Data-Driven Method of Parameter Calibration and Simulation Verification for Microscopic Driving Behavior Model
D3-18	157	Partial and Full Trajectory Reconstruction Under Fixed Detection Range of Multiple Connected and Automated Vehicles
D3-19	184	Evaluation Method for Railway Freight Satisfaction Based on Structural Equation Modeling

D3-20	193	Quantifying the Impact of Metro Disruptions on Surface Traffic: A Structural Congestion Tree Algorithm
D3-21	201	A Chain-Cut Based Classifier: Algorithmic Design and Prospective Deployment in Traffic Digital Twin with Sparse Sensing
D3-22	214	Research on Variable Speed Limit Control Strategies for Accident-Prone Zones on Intelligent Connected Highways
D3-23	234	Optimization and Evaluation of Dynamic Emergency Lane Opening Strategies Based on SUMO Simulation
D3-24	255	Optimization Method for Dynamic Distribution Routing of Emergency Energy Supply for Electric Vehicles
D3-25	264	Spatial Efficiency Analysis of Rail Transit Stations Based on GWR Model
D3-26	265	Research on the Demand Characteristics of the Tourist Chartered Coach Market: A Case Study of Lijiang City
D3-27	281	A Multi-Strategy Train Rescheduling Method for High-Speed Railways under Varying Rainfall Conditions
D3-28	303	Optimization of Railway Alignment Design with Dynamic Performance
D3-29	316	Human Mobility Trajectory Generation Based on Diffusion Model-Transformer
D3-30	318	Psychological Drivers of Vehicle Purchase Decisions Among License Plate Lottery Winners: A MIMIC Model Approach
D3-31	327	Evaluating Subway Drivers' Resilience through Emergency Handling Performance
D3-32	342	Large Language Model-Assisted Knowledge Graph Construction for Emergency Plan Generation in Urban Rail Transit
D3-33	358	Research on the Potential for New Energy Adoption in Freight Transportation Scenarios and the Promotion Path: Utilizing Multi-Dimensional Dynamic Evaluation Methods
D3-34	384	Unveiling Heavy Truck Mobility Patterns through Multi-Source Data Integration: Evidence from Foshan
D3-35	385	Site Selection of University Express Packaging Recycling Center Based on the Center-of-Gravity Method
D3-36	414	An Integrated Urban Logistics System: A Study on Demand Prediction and Allocation under Coopetition between Trucking and Metro-based Freight
D3-37	432	Study on Transmission Characteristics of Bogie Frame Load and Wheel-Rail Force Based on Rigid-Flexible Coupling Model
D3-38	495	Examination of Sustainable Improvement Strategies for the Road Transport of Hazardous Chemicals Utilizing In-Transit Monitoring and Risk Early
D3-39	500	Risk assessment of hazardous materials in road transportation: A review of research progress in China
D3-40	504	Heterogeneity analysis of travel route choice intentions among travelers on national and provincial roads: A case study in Guangxi, China
D3-41	508	Petri Net Modeling and Sustainable Optimization of the Whole Process of E-commerce Express Interception
D3-42	513	Multimodal Assessment and Scenario-Specific Enhancement of Metro Drivers' Vigilance under Dual Scenarios

D3-43	536	Rail Defects Detection with Hard Real-Time Multi-Sensor Measurement System
D3-44	557	Study on Monetary Compensation Strategies for Commercial Toll Highways in China
D3-45	570	Unraveling Spring Festival Travel Blocking: An Explainable Machine Learning Approach for Prediction and Causality
D3-46	578	Extraction of Road Markings and Construction of Road Triangular Irregular Network Based on Road LiDAR Point Clouds
D3-47	584	Mechanical Performance and Dynamic Response of Precast Concrete Pavement under Aircraft Loading
D3-48	596	Optimization Model and Algorithm for Truck Platooning Routing Based on Integer Programming
D3-49	597	Research on Automated Algorithm-Based Traffic Congestion Detection Technology for Expressways
D3-50	601	A Data-Physics Hybrid-Driven Method for Tunnel Excavation-induced Deformation Prediction Based on Improved Sparse Dictionary Learning
D3-51	605	Research on the Evolution and Prediction of Subway Passenger Flow Travel Patterns Based on Topic Models
D3-52	609	Prediction of Highway Engineering Costs with Small-Sample Data Based on Pareto-Optimal Ensemble Learning
D3-53	610	Van Aerde Model Calibration and Bottleneck Identification for Road Segments Using Field-Collected Traffic Data
D3-54	614	Railway Arrival Passenger Flow Prediction Based on TPE-XGBoost Model
D3-55	618	Evaluating Transfer Capacity in Urban Rail Transit Transfer Stations Using a Grey Fuzzy Comprehensive Method
D3-56	620	Research on High-Speed Railway Timetable Rescheduling Under Disruptions Using Proximal Policy Optimization
D3-57	628	Establishment and Verification of a Three-Dimensional Temperature Field Model for Asphalt Mixture during Transportation
D3-58	635	Research on the Collaborative Development of Regional Logistics Parks Based on the ‘Node-Place’ Model: The Case of Xianyang City
D3-59	636	Simulation and Experimental Analysis of Drop-and-Pull Transportation System Based on FlexSim
D3-60	646	A Game Study on the Evolution of Concrete Enterprise Alliance under One-way Technology Sharing and Raw Material Procurement Fulfillment
D3-61	652	Low-carbon Reverse Logistics Network Optimization for Recycled Waste: A Fuzzy Multi-Objective Heuristic Approach
D3-62	659	Analysis of Temporal and Spatial Migration of Campus Traffic Flow: A Case Study of Southwest Forestry University
D3-63	670	Lane-Level Traffic Anomaly Recognition Method Based on Transformer-CNN in Microscopic Dynamic Simulation Environment
D3-64	673	Research on the Measurement and Characteristics of Operational Efficiency in Chinese State-owned Toll Road Companies
D3-65	674	Electric Vehicle And Fuel Vehicle Dispatching Plan Optimization Considering Road Traffic

		Flow
D3-66	688	A Rolling Simulation Prediction Method for Highway Traffic Flow Based on LSTM
D3-67	691	Research on Computable Spatial Modeling and Analytical Methods for Large-Scale Complex Transportation Hubs Based on Digital Twin
D3-68	702	Private Capital Investment Behaviors in Public Transport Based on Prospect Theory
D3-69	720	Two-Stage Framework for Short-Horizon Trajectory Prediction in Dense Mixed Traffic
D3-70	728	Study on Partial-Depth Punchout Mechanism of CRCP
D3-71	729	Study on the Mechanism of Horizontal Cracking Between Layers of CRCP Pavement Under Uniform Temperature Decrease
D3-72	743	Construction of the Evaluation System and Calculation of the Index for High-Standard Transportation Market
D3-73	747	Precise Headway Calculation for Moving Block Systems: A Time-Indexed MILP Model with Train Types and Stopping Patterns
D3-74	754	A Dynamic Spatio-Temporal Graph Neural Network Model for Interactive Behavior Prediction
D3-75	760	Active Guidance Methods for Highway Horizontal Curves under Low-Visibility Foggy Conditions
D3-76	768	Development Potential and Countermeasures for Hydrogen Fuel Cell Trucks in Beijing: A Scenario Adaptation and Cost-Economic Perspective
D3-77	772	Risk Management and Evaluation Model for Metro Facilities and Equipment Based on Bow-tie Model and Bayesian Network: Taking Catenary Failure as an Example
D3-78	781	Train Timetable Optimization Considering Reservation
D3-79	786	Distance-Based Variable Toll Pricing with Discount Tiers for Highway Networks
D3-80	131	Understanding Delivery Drivers' Preferences for Parking Reservation Strategy in Commercial Areas
D3-81	249	Hybrid Electric Truck Platooning and Operation in Large Scale Freeway Network: A Cooperative Co-Evolutionary Optimization Approach
D3-82	258	Systemic Risk Assessment for Sustainable Low-Altitude Logistics: A Hybrid ISM-Bayesian Network Method
D3-83	502	Analysis of Emergency Evacuation Strategies for Urban Subway Tunnels Based on Immersive Virtual Reality and Agent-Based Simulation
D3-84	628	Establishment and Verification of a Three-Dimensional Temperature Field Model for Asphalt Mixture during Transportation
D3-85	680	Predicting Truck Stop Behavior through Semantic Encoding and Decoupled Temporal Modeling
D3-86	745	Integrated Optimization of Train Speed Profiles and Timetables under Moving Block Systems

Poster Session D4

16:00-17:30 Jul. 15, 2026 2026 年 7 月 15 日 16:00-17:30

Transportation Safety and Security

交通运输安全与安保

Low-Altitude Technology and UAV Applications

低空技术与无人机应用

Poster ID	Paper ID	Paper Title
D4-1	12	Analyzing Impact of Weather and Lighting Conditions on Traffic Accident Severity
D4-2	35	Study on the Impacts of Temperatures and Humidities on Highway Vehicle Speed
D4-3	37	Analysis and Control of Driving Stability of A-double vehicle Combination
D4-4	39	Highway Driving Safety Assessment in Foggy Conditions
D4-5	51	Experimental Evaluation of Collision Avoidance Efficacy Enabled by Smart Road Stud across Multiple Near-Crash Scenarios
D4-6	53	Quadrotor Dynamics Modeling and Optimal Control in Complex Urban Wind Fields: Resilience Metrics and Computational Challenges
D4-7	85	Explainable AI for driver fatigue: EEG–Eye tracking based multimodal detection and interventions
D4-8	90	Review of UAV Location Models and Their Applications in Traffic Scenarios
D4-9	101	Identification of Intersection Risk Hotspots Considering the Direction of Risk Propagation
D4-10	102	Research on identification of rider risk behavior and collision risk modeling based on trajectory mining
D4-11	138	Identification of Hazardous Zones at the Exits of Symmetric Double-Loop Cloverleaf Hub Interchanges
D4-12	142	Research on Intelligent Identification of Traffic Safety Facilities Distresses Based on Unmanned Aerial Vehicle Inspection and Deep Learning
D4-13	152	Driving Behavior Analysis and Recognition under Anxiety Emotion Based on Temporal Sequence
D4-14	160	An Iterative Greedy Algorithm for the Rider-Drone Joint Delivery Optimization Problem with No-Fly Zones
D4-15	189	Addressing Data Scarcity in Traffic Conflict Analysis: A MAML-based Transfer Learning Approach
D4-16	207	A Study on Traffic Conflict Risk at Expressway Merging Areas Based on Vehicle Trajectory Data: A Case Study of the Huannan Expressway and Guangzhou–Heyuan Expressway
D4-17	220	Analysis of Traffic Flow-Velocity Relationship Under the Interference of Merging Traffic and Roadside Openings Based on UAV Aerial Data
D4-18	238	TCAS: A Fine-Grained Roadside Surveillance Dataset for Traffic Crash Anticipation
D4-19	244	A Roadside Sensing-Driven Collision Warning System for Vulnerable Road Users in Connected Traffic Networks
D4-20	250	Method for Recognizing Risky Driving Behaviors by Integrating Driving Style and Multi-Source Data

D4-21	257	CrashKG: Modeling and Application of Temporal Knowledge Graphs for Traffic Accident Reports Assisted by Large Language Models
D4-22	274	Driving Style Recognition for U-Turn Conflicts: A Machine Learning Approach with Roadside Radar-Camera Fusion
D4-23	282	Analysis of the Injury Severity Involved in Single Vehicle Crashes on Curved and Sloped Roads Considering Temporal Instability
D4-24	283	A Multi-Dimensional Data Evaluation Method for Novice Site Driving Ability Based on Robot Instructor Vehicles
D4-25	286	Investigating the Spatial Heterogeneity of Key Causal Factors for Traffic Conflicts on Urban Expressways
D4-26	310	Towards Safer Freeway Work Zones: An Analysis of Factors Influencing Traffic Crashes Using CatBoost-SHAP
D4-27	319	Evaluating Gradient Boosting and Cost-Sensitive Learning for Imbalanced Freeway Traffic Conflict Prediction with Predictive Spatio-Temporal Features
D4-28	340	Drivers' Hazard Perception and Behavior in Vehicle–Two-Wheeler Collision Scenarios
D4-29	345	Vehicle abnormal roar feature analysis method based on Mel-spectrograms using UAV collecting audio data
D4-30	349	Evaluation of Policy Tool Combination Effects for Urban Air Mobility from the New Quality Productivity Perspective
D4-31	352	A spatial modeling method based on the statistical scale features of road targets for UAV detecting images
D4-32	374	Integrated Optimization of Roadway Facilities and Intelligent Warning Systems for Nighttime Curve Safety: A Driving Simulator Study
D4-33	386	Modeling lane-changing forward risk considering vehicle type and unobserved heterogeneity
D4-34	387	Comparative Analysis of Driving Behaviors and Crash Causes in ADAS and ADS Vehicles Using NHTSA Data
D4-35	408	Traffic Risk Coupling Analysis and Safety Control Strategies for Complex Scenarios of Hydropower Stations
D4-36	430	Route Optimization Method for Truck–Drone Collaborative Delivery Considering User Profiles under Regional Constraints
D4-37	439	Safety and mobility analysis of autonomous ridesharing services
D4-38	440	Large-3D-Bridge Scanning simulation and control framework based on Multi-Agent Reinforcement Learning
D4-39	459	Study on the Optimization Design of Guide Sign in Dense Highway Interchange Areas Based on Driving Simulation
D4-40	460	Association Rule Mining of Driver Emotions and Aggressive Driving Behavior
D4-41	474	A Study on the Effectiveness of HUD Intervention on Fatigued Driving Among Truck Drivers Based on Driving Simulation Experiments
D4-42	475	Quantitative Analysis of Fatal Risk Factors in Hazardous Chemical Road Transportation Accidents Based on a Logistic–24Model
D4-43	498	Study on road dangerous goods transportation safety risk evaluation by using combined

		weighting method and cloud model
D4-44	501	Identification of Freight Traffic Safety Hazard Points Based on Prior Knowledge and Random Forest Algorithm
D4-45	533	Heterogeneity of Drivers' Risk-Perception Propensity under Pedestrian-Crossing Scenarios on Mountain Highways: A Driving-Risk-Field-Based Study
D4-46	558	Analysis of Different Types of Drivers' Understanding of Traffic Signs for Escape Lanes
D4-47	568	A Potential Field Theory-Based Method for Assessing Traffic Environment Complexity
D4-48	587	Random-Parameter Bayesian Hierarchical Generalized Pareto Distribution Modeling Approach for Conflict-Based Pedestrian-Vehicle Safety Evaluation
D4-49	595	Research on UAV-Truck Cooperative Distribution Path Planning
D4-50	615	Research on risk assessment and early warning technology of pavement operation in rainy weather
D4-51	617	Analysis of Skid Resistance Enhancement Technologies for Different Highway Asphalt Pavements
D4-52	625	Research on Flight Object Detection in Airport Terminals Based on YOLOv8 and MLP Fusion
D4-53	630	Comparative Effects of Multimodal Warnings on Drivers' Visual Fatigue and Mental Workload in Extra-Long Tunnels
D4-54	640	Urban Air Mobility for Resilient Cities: A Theoretical Framework and Development Pathway
D4-55	654	Prediction and Visualization Analysis of Accident Severity at Heterogeneous Intersections Based on SMOTE-Tomek-LightGBM
D4-56	655	Risk Assessment of Mountainous Urban Road Networks Based on Intelligent Connected Vehicles
D4-57	660	Analysis of Longitudinal Acceleration Characteristics on Continuous Sharp and Steep Curves in Mountainous Areas under an Intelligent Connected Environment
D4-58	662	A Lightweight Vision-Based Framework for Real-Time Forward Collision Risk Assessment
D4-59	666	Pose, Pixel, and Causality: Temporal Causal Reasoning for Multimodal Driver Behavior Recognition
D4-60	672	Analysis of Highway Tunnel Accident Frequency Models with Heterogeneity Considerations
D4-61	678	Analysis of Contributing Factors in Water Traffic Accidents Based on Association Rule Mining
D4-62	687	A Nonstationary Microscopic Safety Assessment Method Integrating Drivers' Early-Stage Conflict Response
D4-63	731	Comparative Analysis of Accident Severity Factors: Electric Vehicles vs. Internal Combustion Engine Vehicles
D4-64	736	Active Risk Management for Mixed Traffic with CAV Degradation in Extreme Weather
D4-65	763	Research on Low-Altitude UAV Flight Path Planning and High-Precision Slope Image Acquisition

D4-66	765	Analysis of the Impact Zone of Expressway Tunnel Accidents and Control Pre-warning Strategies
D4-67	766	Construction of an Autonomous Driving Disengagement Knowledge Graph Based on Multi-source Texts
D4-68	775	Research on the Classification Methods and Standards for Risks of highway Road Facilities
D4-69	776	Highway Guardrail Collision Accident Detection and Active Vehicle Collision Avoidance Guidance Method
D4-70	777	Intelligent monitoring system for damage to inland waterway revetment based on UAV inspection
D4-71	780	Planning of Urban Logistics Delivery Services with UAV–Delivery Rider Collaboration under Demand Uncertainty
D4-72	791	Application of BP Neural Network in Resilience Assessment of Embankment Slopes
D4-73	797	Research on Traffic Safety Risk Prediction in the Entrance and Exit Area of Highway Underground Interchange
D4-74	803	Identification of Highway Accident-Prone Sections Based on Machine Learning and an Improved DBSCAN Algorithm
D4-75	140	Joint analysis of intervals and injury severities involving the same driver: A novel multivariate joint survival model approach
D4-76	175	Enhancing lane-change intention recognition through driver experience classification: A multimodal fusion of eye-tracking and vehicle kinematics
D4-77	218	A Driving Load Perspective on Traffic Oscillations in Long Tunnels and Its Implications for Traffic Stability and Safety
D4-78	248	Hazard-Reasoner: Reinforcement Learning-Enhanced Vision-Language Models for Traffic Hazard Reasoning and Driver Warning
D4-79	256	Design and Validation of Personalized Takeover Strategies in Level 3 Automated Driving Scenarios
D4-80	261	Evaluating C-V2X-Enabled Stop/Go Advisory System on Driver Yellow Dilemma Behavior: A Driving Simulator Experiment
D4-81	390	Multiple Drone-vehicle Parallel Scheduling Optimization in Humanitarian Logistics
D4-82	392	Does cross attention mechanism outperform conventional feature extraction and ensemble learning regarding novice driver recognition?
D4-83	398	Clustering-classification hybrid method for personalized driver fatigue detection based on wearable device and driving behavior data
D4-84	509	Computer Vision-based Method for Assessing Collision Risk in Wide-Range Expressway Diverging Area Using a Two-Dimensional Surrogate Safety Indicator
D4-85	530	Machine Learning Approach for Predicting Short-Term Traffic Resilience Recovery After Traffic Conflicts
D4-86	685	Hysteresis Phenomenon in Traffic Safety Analysis: Identification, Quantification, and Evaluation

Poster Session D5

8:30-10:00 Jul. 16, 2026 2026 年 7 月 16 日 8:30-10:00

Transportation Infrastructure Sustainability and Resilience

交通基础设施可持续与韧性

Other Topics

其他主题

Poster ID	Paper ID	Paper Title
D5-1	5	Review of Characteristics and Performance Assessment of Urban Rail Transit Station Areas under Stock-Oriented Development Stage
D5-2	7	Research on BIM-based Carbon Emissions in the Bridge Materialization Stage and Implications for Human Resource Management
D5-3	20	Application Research on Bridge Settlement Analysis Based on InSAR Technology
D5-4	24	Spatial-Temporal Evolution Analysis of Air Transport in China: Based on Civil Aviation Transport Data from 2010-2023
D5-5	27	Optimizing Driving Behavior of Older Drivers at Intersections: An Empirical Study Based on Self-Determination Theory
D5-6	61	Research on Fatigue Life Prediction of Asphalt Pavements Based on Measured Strain
D5-7	68	Molecular Dynamics Simulation of the Effect of N-tetradecane on Asphalt Components and Interfacial Compatibility
D5-8	88	Optimization of Key Geometric Parameters of Highways in Autonomous Driving Scenarios
D5-9	106	Research on the Setting Conditions of Two-lane Entrance Auxiliary Lanes for Six-lane Expressways
D5-10	117	Identification and Evolution Analysis of Multi-level Functional Centers in Shanghai Metro Network Based on AFC Panel Data
D5-11	144	Assessments of dynamic mechanical responses of full-structural recycling asphalt pavement via viscoelastic finite element modeling
D5-12	145	Study on Minimum Spacing of Consecutive Mainline Exits in Interchanges with Right-Turn Ramp Post-Positioning Form
D5-13	147	An Intelligent Diagnostic Framework for Multidimensional Sidewalk Walkability Based on Large Language Models
D5-14	158	Research on the Coordination Degree Between Built Environment and Urban Vitality in Subway Station Areas Based on Deepseek
D5-15	190	Enhancing Resilience in Multimodal Public Transportation Networks: A Simulation-Based Analysis Framework for Station Failure Recovery
D5-16	192	RT-DETR-MoE: Towards Ultimate Expert Specialization in Mixture-of-Experts End-to-End Object Detection with Transformers
D5-17	205	Toward an Identification Method for Highway Infrastructure Master Data: A Sector-Oriented Perspective
D5-18	225	Electropulse Treatment for Toughness Enhancement and Crack-Healing in Welded Zones of E690 Shipboard High-Strength Steel
D5-19	240	Greenwave Design's quantitative analysis of vehicle operating conditions and carbon emissions
D5-20	247	A Hybrid Pavement Performance Prediction Model Based on the Structure of Residual

		Learning Framework
D5-21	273	Research on Image Fusion-Based Dataset Augmentation and YOLOv8 Detection Methods for Bridge Defects
D5-22	284	User Behavior-Driven Simulation and Optimization of Highway Service Area EV Charging Facilities
D5-23	331	Study on Technical Condition Prediction Method of Medium-Small Span Concrete Girder Bridges Based on Neural Network
D5-24	337	From the Global to the Scene: SHAP-driven Risk Stratification and Out-of-Time Validation
D5-25	347	Performance and Environmental Impact Analysis of Road Surface Luminescent Materials Based on Environmental Protection and Safety Concepts
D5-26	360	Research on the Expansion of Logistics Functions and Model Innovation in Open Service Areas of Highways from the Perspective of Agricultural Tourism Integration
D5-27	421	Mobile Charging System Optimization for Highway Service Areas
D5-28	436	Crack-RTDETR: A Road Crack Detection Algorithm for Small Targets and Complex Backgrounds
D5-29	437	Multi-Period Location and Capacity Planning of Electric Bus Charging Stations: Optimization Model Development and Algorithm Design
D5-30	454	Robustness Analysis of Urban Public Transport Network Based on Node Importance
D5-31	467	Flight Schedule Optimization Based on Delay Prediction for Airport Departures
D5-32	472	Critical Stations Identification for Bus-Metro Composite Network under Rainstorm Scenarios
D5-33	480	Promoting Bicycle Use: A Focus on Spatiotemporal Autocorrelations and Nonlinearity
D5-34	505	Multi-Scale Discrete Element Method Investigation of the Failure Behavior of Ultra-Thin Overlays on Rutted Pavements
D5-35	506	How does Multi-View Imagery Influence Pavement Distress Detection? A Holistic Training Strategy and Its Performance
D5-36	515	Full-Life-Cycle Strain Monitoring of Expressway Slopes Using Embedded Fiber Bragg Grating (FBG) Array Sensors: A Case Study on the Jinggang'ao Expressway
D5-37	576	Precise Mass Transit Route Optimization Based on Big Data Modeling and Simulation Platform
D5-38	581	Low-Clinker Cement with Mineral Micropowders: Performance and Carbon Reduction Potential
D5-39	598	Cascade Failure Effect of Highway Complex Network Under Nodes Attack
D5-40	602	A Three-Stage Framework for Performance Evaluation of Hurricane Evacuations Using Large-Scale Observed Traffic Data
D5-41	603	Investigation of the Influence of Fine Aggregate Content on the Packing Characteristics of Aggregate Mixture based on Discrete Element Method
D5-42	604	High Absorptance Coating Enabled Highway Guardrail Thermoelectric Power Generation System

D5-43	606	Research on Evaluation of Transfer Efficiency in multimodal passenger transportation hub
D5-44	616	Design of Rotary Ice-breaking Blade for Mid-compacted Ice Layer by Using Particle Swarm Optimization Algorithm
D5-45	633	An Efficient Traffic Facility Detection in UAV Imagery based on Knowledge Distillation and Vision-language Alignment Technique
D5-46	638	SAM-Guided Mutual Learning for RGB-Thermal Semantic Segmentation in Traffic Scenes
D5-47	644	Annual Maintenance Effect Evaluation of Asphalt Pavement by Integrating Machine Learning and Causal Inference
D5-48	645	A Generalized UAV Image-based Pavement Distress Classification Program Using Segment Anything Model and Vision Foundation Model
D5-49	656	Urban Waterlogging influenced by Vegetation distribution in Kunming City
D5-50	658	Effects of SAP on Impermeability and Crack Evolution of Pavement Concrete under Wheel-loading and Hydrodynamic Coupling
D5-51	682	The Impact of Pavement Potholes on Safety and Comfort for Autonomous Electric Vehicles
D5-52	683	Exploration into the Path of Digital Transformation and Upgrading of Intelligent Transportation Infrastructure
D5-53	684	Advances in Visual SLAM Technology Based on Deep Learning
D5-54	701	Study on temperature shrinkage performance of basalt fiber-reinforced concrete under different curing environments
D5-55	705	The Impact of Travel Services on Infrastructure Development: A Mediation Effect Analysis Based on Survey Data
D5-56	710	Application of Anti-slip Structure Restoration Technology for Concrete Pavement in Expressway Tunnels
D5-57	715	Prediction of Carbonation Depth in Highway Bridges: A Data-Driven Approach Using Field Inspection Data
D5-58	723	CCDNet: A Deep Learning-Based Network for Concrete Crack Detection
D5-59	730	Optimization of a Cement-Emulsified Asphalt Mortar Formulation with High Fluidity and Early-Age Strength for Repair Applications
D5-60	732	Predicting Asphalt Absorption in Steel Slag Aggregates The Role of Effective Density and Pore Structure
D5-61	756	A Balanced Design Framework for Determining the Maximum RAP Content in Hot-Mix Recycled Asphalt Mixtures
D5-62	773	Experimental Study on Stress Compensation Performance of Steel Fiber-Reinforced Expansive Concrete in Precast Prestressed Pavement Slabs
D5-63	774	Study on applicability and performance improvement of emulsified asphalt cold recycled mixture in expressway middle layer
D5-64	778	Recommended Asphalt Pavement Structure With Flexible Base For Regions With Large Temperature Differences
D5-65	782	Study on the Proportion Design of Waste Powder of Asphalt Mixing Station

D5-66	783	Effect of Modified Spent Coffee Grounds on Macro Rheological Properties and Anti-aging Properties of Asphalt
D5-67	789	Cascading Failure Vulnerability Analysis in Urban Rail Transit Network
D5-68	798	Visual Analysis of Asphalt Aging and Regeneration Research Based on CiteSpace Software
D5-69	801	A Game-Theoretic V2X Framework for Pedestrian Safety in CAV Environments
D5-70	153	Quantification of Pavement Milling Morphological Characteristics and Their Influence on the Freeze-Thaw Resistance of Interlayer Bonding in Thin Overlays
D5-71	206	Research on the mechanism of influence of skeleton structural characteristics of asphalt mixture on its low-temperature cracking performance
